Managing Risk with RelianSys®

RelianSys®
Transforming Governance

ReliantSys®
Transforming Governance

ReliantSys® Risk puts you in complete control. Powerful, and easy to use, this solution will enable you to go above and beyond, to actually manage Risk. You'll empower everyone in your team into ISO 31000 risk management. A single source of truth, with clear line of sight to deployed risk management.

Identification, assessment, control, treatments and reporting, Reliansys® Risk covers it all.

Manage more than just Risk

Reliansys® Risk, Compliance, Monitor, Incident and Audit modules, when bundled together, work as one total risk management system. They can also be implemented as separate modules.

Together, they form a complete risk management framework, giving you complete control and oversight of all these vital parts of your organisation's risk control.

Contact us now for a special deal on multiple modules.

Risk

Securely hosted in the cloud, it's perfect for working remotely

- Completely Customisable to your own risk approach
- Centralised Risk Library for total governance oversight

- Deploy risk management with an owner for each Risk
- Fully integrates risk management with your internal policies and procedures
- Improve your assurance with controls testing and task functions
- Integrate incidents with risks for end-to-end control
- Easy to navigate and deploy

Manage More Than Risk

Monitor

ReliantSys® Monitor is your customised compliance calendar.

It schedules, reminds, tracks and centralises all critical actions in one place. It fulfils all your monitoring requirements, replacing all those spreadsheets you've been using.

- Create records with customised fields and allocate an owner to every item
- It schedules, reminds and tracks so that you never miss an essential action
- Immediate escalations so nothing is missed

Incident

ReliantSys® Incident keeps you safe by streamlining the mandatory process of registering all occupational health and safety injuries or incidents – as well as all other kinds of incidents you encounter.

Seamlessly link incidents to risks through integration with ReliantSys® Risk to see the size of a problem, more accurately assess the risk level, and manage correction.

- Improve your ability to investigate, gain insights and implement corrective actions
- Fully Customisable to suit organisations of every size

Compliance

ReliantSys® Compliance is the proven solution for your compliance management, combining intuitive workflows with online legislative content. It drives efficiency by automating the hard work of deploying responsibility and verifying compliance performance.

- Streamline the whole process with online registers of legislative obligations
- Puts you in complete control of compliance management
- Fully integrates compliance with your internal policies and procedures

Audit

ReliantSys® Audit enables you to manage all your internal and external audits. It brings them together into one place, giving you direct audit management. And the tasks function ensures the findings are directed to the right people, and actioned.

- Managing audits for one team or multiple sites
- Maintain control of your audit program in one place, from scheduling to reporting
- Automate and delegate audit findings and recommendations, with total line of sight

What makes us different

- **User friendly** – Our user interface is clean and modern, intuitive to navigate and quick to load.
- **Quick implementation** – Our system is easy to configure, learn and implement. You are getting results in days, not weeks
- **Ongoing support** – Our standard package includes phone, email and online support plus all standard software updates and upgrades.
- **Reasonably Priced** – Everyone deserves good software. With RelianSys®, every organisation can obtain a solution that's affordable and great value for money.

There's an easier way. RelianSys®

You've waited long enough. You owe it to yourself.
